TULIPS

Tulips are so hardy and easily cared for, and they bloom so freely in city or country, in sun or in shade, that their popularity increases year by year. We have indicated by figures after the names the average height in inches to which they grow. Tulips suitable for forcing are indicated by a star (*). The order of flowering is indicated by the letters A, B, C, and D. Those under the A class may be planted with the B class and the B class with the C class, etc.

POSTAGE ON ALL TULIPS. If wanted by parcel post, add postage at your zone rate. One dozen bulbs weigh 1 pound; 100 bulbs, 8 pounds.
